

AES BUILDING AND HOME IMPROVEMENTS

We wish to express our gratitude to Scott and Mike for their design and work performance in remodeling our new kitchen. We must say that the old kitchen was drab, outdated, and not functional. However, after contacting AES and discussing our concerns with Scott about designing the kitchen, we felt confident that we made the right decision. We later met Mike, the technician, who really made the kitchen design come alive in a professional and outstanding manner paying very close attention to even the smallest details. We are more than satisfied with our new kitchen...it looks so great that it should be placed in a kitchen magazine. We would highly recommend AES to our relatives, friends, and coworkers because their teamwork, skills, and workmanship provided us with a great product...**a new kitchen!** Their motto holds true, "If you are not satisfied then we are not finished.

We are definitely Raven fans for AES.

Barbara and Charles
